

Case Study

Customer: CLH-PS (Previously OPA)

Locations: Redcliffe Bay PSD (A Tier 1 COMAH Site).

Task: To empty, clean, gas free and prepare the tanks for inspection and repair by 3rd parties:

- Acting as principal contractor under CDM.
- Providing welfare facilities for the works.
- Permit issuing and control of works.
- Mechanical isolation of the tanks.
- Emptying, cleaning and gas freeing tanks.
- Preparing the tank internally using shot-blasting to SA 2.5 prior to inspection.
- Removal and disposal of all hazardous waste produced during the above operations.
- Supervising and providing safety cover, including confined space rescue crews to the 3rd party inspectors and mechanical contractors appointed by the client.
- Chemical washing the tanks post repairs to prevent bacterial contamination.
- De-isolation of the tanks to return them to service.
- Preparation of quality documentation and hand over of the tanks and CDM files to the operator post works.

Value: £160K
